(54) MOBILE COMMUNICATION SYSTEM, MASTER BASE STATION AND SLAVE BASE STATION

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a mobile communication system in which the number of wireless base stations to be group controlled can be increased and multi-channel connected without requiring alteration of hardware arrangement and without concentrating the control load to a master base station.

SOLUTION: A section 101 for controlling the control channel on the wireless circuit side is provided only in a master base station 1. Wireless base stations 1-99 constituting a group control base station group 100 are provided, respectively, with sections 111-119 for controlling the control channel on the wired circuit side.
